Red Wine

TYPE OF WINE

RED WINE

GRAPE VARIETIES

Tempranillo 100%

ALCOHOLIC STRENGTH

12,9 % Vol.

PRODUCTION AREA

D.O.Ca.Rioja

VINEYARDS AND SOIL TYPES

Situated in our family state. In Castilseco (Rioja Alta). Plots located at 550 metres altitude on the foothills of the Obarenes mountains.

VINIFICATION

For the elaboration of our young red wine , we select the best vineyards through the follow-up of the grapes ripening. The optimal moment is sought for the harvest, to ensure our wine characteristics qualities: fruity aroma, purple-violet colour and its voluminous taste of ripe red fruit. After selecting the plots, the grapes are destemmed, and they go for a controlled fermentation in stainless steel tanks, obtaining all their essence by daily gentle pumping until the end of their first fermentation. Subsequently, the second mannolactic fermentation takes place, which is done naturally, always ensuring temperature control.

TASTING NOTES

Red wine with purple- violet shades on the edge of the glass, good intensity of colour. Deep, pleasant nose, hints of ripe red fruit, cotton candy and a violet notes background. On the palate, warm on entry, voluminous and with a good sensation of acidity at the edge of the tongue. Pleasant ripe red fruit in the retorsanal.

FOOD PAIRING

Aperitives, rice, grilled vegetables, stews and roasts meat.

SERVICE

14º C
